Educational Values:

World of Maths offers an opportunity for your pupils to acquire a variety of different skills and strategies needed for problem solving.

During our sessions your pupils will experience mathematics related to practical and real-life situations. Motivation is very important. World of Maths offers an enjoyable and attractive learning experience.

Each set has 17 large, colourful, problem solving activities covering the strands of number patterns, space, measurement, graphs, statistics, logical thinking and sequencing, and mathematical understanding.

We have an emphasis on team work, with pupils working together in small groups discussing answers and different outcomes. Comprehension is also an element, reading and comprehending the questions being asked.

Each set of displays contain corresponding worksheets for the pupils to keep on task and track their answers for discussion at the end. And an 8 page teacher booklet, with a description of the activities and the skills and strategies your pupils will use.

We have several sets of activities designed so we may return to a School on an annual basis or when desired.
